

STAYS PUT. EVEN IF YOU SWIM AGAIN. AND AGAIN.

AND 6 OTHER REASONS WHY EVY IS
RECOMMENDED BY DERMATOLOGISTS:

1

LONG-LASTING AND EFFECTIVE.

EVY's base formulation is a patented medical invention that allows the mousse to spread through the top layer of the skin rather than staying on the surface. Therefore, the protection will not diminish when you swim, sweat, or dry yourself with a towel. The sunscreen mousse lasts up to 6 hours.

2

ABSORBS QUICKLY. NON-STICKY.

The mousse is absorbed quickly, making it easier to use the recommended amount. EVY doesn't clog pores, allows the skin to breathe and leaves no film. Can also be used on the scalp, around the eyes and lips. The mousse gives you twice as many applications as the equivalent amount of cream.

3

HIGHEST PROTECTION.

The SPF on the bottle indicates protection against UVB rays that burn the skin. But sunscreen only needs to have 33% of the factor's value against UVA rays, which go deeper into the skin. All EVY's products have more than 90% UVA protection, which makes it particularly suitable for children and people with sun-sensitive skin.

4

EXTRA MILD FORMULATION.

EVY's formula strengthens the skin's protective barrier whilst being extra gentle. This is also why it's recommended for people with sun allergies and sunscreen sensitivity. Because the aerosol container remains sealed, the sunscreen stays fresh and bacteria-free until it's finished. Free from preservatives, fragrance and nanoparticles.

5

EXTREMELY WELL TESTED.

EVY Sunscreen can be used from six months of age and upwards, and by anyone with high demands from their sunscreen. Among others, it has been used on the EF boats in the Volvo Ocean Race, by the contestants of the TV show 'Survivor', and by a large number of elite athletes since 1999.

6

A SAFE PROTECTION.

For people who suffer from vitiligo, a skin condition that causes areas of the skin to lack protective melanin, an effective sunscreen is essential. The Vitiligo Association of Sweden recommends EVY Sunscreen to its members. EVY comes in SPF 10, 20, 30, 30 kids and 50. Made in Sweden.
